Phone: 309-614-8943
Address: 414 Rainbow Dr, Creve Coeur, IL 61610

Core Competencies

Villan Security LLC helps small and midsize organizations strengthen their cybersecurity posture by addressing the root problems that hinder detection, response, and trust. We specialize in building clarity and confidence into security operations, especially for under-resourced teams. Our flagship prototype, Transparent Defense, uses explainable artificial intelligence (XAI) to demystify alert logic, uncover multi-stage threats, and empower faster decisions.

Certifications

- CISSP – Certified Information Systems Security Professional
- CISM – Certified Information Security Manager
- CASP+ – CompTIA Advanced Security Practitioner
- CRTO – Certified Red Team Operator *(in progress)*
- CySA+, PenTest+, Security+
- Blue Team Level 1 (BTL1),
- ISC2 Certified in Cybersecurity
- Mile2 C)DRE – Certified Disaster Recovery Engineer

Differentiators

- Focused on helping teams understand and act on their data, not just collect more of it
- Strong foundation in threat-informed defense (MITRE ATT&CK, D3FEND, CARTA)
- Transparent Defense enables maturity tier growth for organizations with minimal staffing
- Research-backed development with PhD-level leadership and real-world SOC experience
- Local presence with national readiness through digital-first operations

Past Performance

- Founder led cybersecurity efforts for a publicly traded manufacturing firm
- Contributor to InfraGard, community threat intel, and cyber-physical security working groups
- Experience across detection platforms: Wazuh, Suricata, SentinelOne, ELK, and more
- Developed internal detection playbooks and trained non-technical staff on phishing and security behavior

Current Initiatives

- Transparent Defense: AI-powered detection explanation and multi-signal correlation
- Small Business Innovation Research (SBIR) grant exploration and federal readiness
- Local awareness and incident readiness support for regional agriculture and manufacturing sectors

Target Partners & Customers

- Federal agencies and defense-focused contractors
- Local and regional governments
- Critical infrastructure operators (chemical, food, transportation, etc.)
- Universities and research institutions focused on security automation or AI trust
- Technology vendors seeking explainability tooling or niche SOC innovation
