**Villan Security LLC – Capabilities Statement**

Document Version: January 2026

<u>**Core Information**</u>

**Legal Business Name:** Villan Security LLC
**Website:** https://www.villansecurity.com
**Unique Entity ID (UEI):** GGRSHLHKMF21
**SAM.gov Registration:** Active
**Business Structure:** Member-managed LLC
**Established:** 2025
**State of Incorporation:** Illinois

**NAICS Codes:**

- 541618 – Other Management Consulting Services

- 541512 – Computer Systems Design Services

- 541519 – Other Computer Related Services

- 541690 – Other Scientific and Technical Consulting Services

---

**Core Competencies**

Villan Security LLC provides virtual CISO (vCISO) and fractional security leadership for small and midsize organizations that need clear security ownership, defensible risk decisions, and an executable roadmap.

We specialize in helping organizations move from reactive security activities to structured, risk-informed programs that leadership can understand, support, and govern.

Core services include:

- Virtual CISO and fractional security leadership

- Security program design and operating model development

- Enterprise risk identification, prioritization, and reporting

- Board and executive level cybersecurity briefings

- Policy and standards development aligned to business constraints

- Incident readiness planning and tabletop exercises

- Vendor and tool rationalization

- Audit, insurance, and customer security questionnaire support

---

**Certifications and Credentials**

- CISSP – Certified Information Systems Security Professional

- CISM – Certified Information Security Manager

- CASP+ – CompTIA Advanced Security Practitioner

- CySA+, PenTest+, Security+

- Blue Team Level 1 (BTL1)

- ISC2 Certified in Cybersecurity

- Mile2 C)DRE – Certified Disaster Recovery Engineer

---

**Differentiators**

- Fractional executive leadership without managed service lock-in

- Focus on decision clarity, accountability, and governance rather than tool deployment

- Strong grounding in risk management, detection strategy, and incident readiness

- Experience translating technical risk into business-relevant terms for leadership

- Designed for organizations with limited security staffing and budget constraints

- Research-informed approach led by a doctoral candidate in Information Security

---

**Past Performance and Experience**

- Led and operated cybersecurity programs for a publicly traded manufacturing organization

- Served as the primary security authority for enterprise risk, detection, and response decisions

- Developed and maintained incident response procedures, security policies, and executive reporting

- Designed phishing response workflows and delivered security awareness coaching to non-technical staff

- Experience across security platforms including Wazuh, Suricata, SentinelOne, ELK, and endpoint controls

- Contributor to InfraGard and cross-sector security and resilience working groups

---

## Current Focus

- vCISO and fractional security leadership engagements

- Executive and board level cyber risk communication

- Security program maturity and operating cadence development

- Audit readiness and evidence strategy for regulated and insured organizations

---

## Target Customers

- Small and midsize organizations without a full-time CISO

- Manufacturing, agriculture, and critical infrastructure adjacent firms

- Healthcare, SaaS, and professional services organizations under audit pressure

- Local and regional governments seeking security leadership without headcount expansion

- Organizations preparing for cyber insurance renewal, regulatory scrutiny, or growth

---
